 65% ✓
 } ≠ 100%

(Q3)

If the aim is to highlight the behaviour of the product sales in the past year, then which of the following visualizations would be best suited?

(Q4)

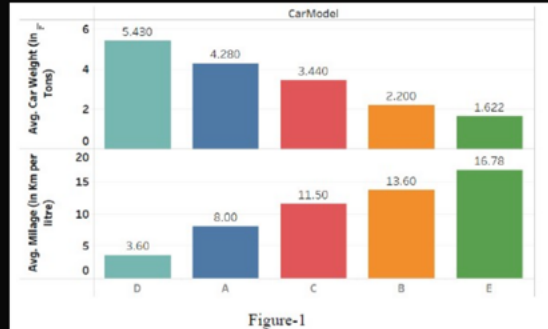

When is a "Pie Chart" the best visualisation option for presenting data (choose all that is/are applicable)?

OPTIONS:

- ☒ When the outliers in the data need to be shown
- ☒ When trends in the data need to be shown
- ☒ When relationship between variables need to be shown
- ☒ None of these

(Q5)

Given Figure-1, what is the message that can be best conveyed through the graph?

OPTIONS:

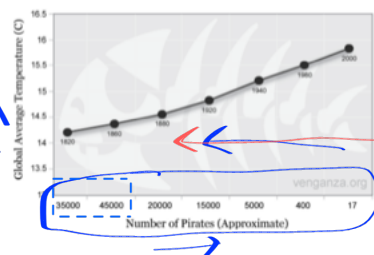

- ☒ Message: "Mileages trend for different Models"
- ☒ Message: "Relationship between Car Weight and Mileage"
- ☒ Message: "Relationship between Models and their Car Weights"
- ☒ Message: "Car Model wise minimum and maximum Avg. Mileage and Avg. CarWeights"
- ☒ Message: "Model wise relationship between Car Weight and Mileage"
- ☒ Message: "Car weight wise Mileage trend for different Models"
- ☒ Message: "Mileage wise relationship between Models and their Car Weights"

(Q 6)

From the given figure, which of the below statements are true?

- a. The number of pirates does not increase with the global average temperature increase
- b. There is a positive correlation between the number of pirates and the global average temperature increase
- c. There is no correlation between the number of pirates and the global average temperature increase
- d. None of the above

Global Average Temperature Vs. Number of Pirates
